EMERGENCY: Call 000 for fire, ambulance, or immediate life-threatening situations

Important:

- >> Keep a printed copy on your fridge and save a digital copy to your phone.
- >> Verify all numbers are current before the renovation starts.
- >> Add your site supervisor's contact at the top of the list.
- >> Update this sheet whenever a contractor changes their number.

Pro tip: Store a copy in your glovebox and with a neighbour. During a renovation, water and electrical emergencies are common -- having numbers at hand saves hours of panic.
